

**Nasrin Eshraghi Ivani**

Nasrin Eshraghi Ivani is a graduate student in Data Science, working in the People In Motion Lab at the University of New Brunswick (UNB), Canada. Currently, she is doing her research on machine learning and data mining techniques to implement an IoT platform for data streaming clustering on Spatio-temporal and indoor positioning data.

Ms. Ivani has a master's degree in computer science, specializing in Distributed Computing from Universiti Putra Malaysia (UPM). At UPM, she developed a network routing protocol with a genetic algorithm. After her graduation, she has worked with several universities as a part-time lecturer in computer science. In addition, she has experience working as an R&D engineer in the IT industry. During that time, she was responsible for the analysis and visualization techniques to increase the usability of data for the Location-Based Service (LBS) and Intelligent Transport Systems (ITS) department
