

Extended Abstracts Template for AutoCarto 2022

First A. Author^{a*}, Second B. Author^a and Third C. Author^b

^a Department, University, City, Country

^b Department, University, City, Country

* first_last@email.edu

Keywords: alphabetical, lowercase except proper nouns, maximum six

Introduction – A level one heading

This document presents the instructions needed to prepare the extended abstract. The abstract should be no more than 1,500 words (excluding references) with clear statements on the objectives of the work and its novelty. We welcome completed research projects, work in progress, or visionary works that probe new directions in cartography and GIScience. We will notify authors of selected abstracts and a due date for conference registration. Authors must register the conference before we publicly announce the selection. The rest of the text in this template provides hints about properly generating the parts of your APA-formatted paper.

The document should start with the title, authors, authors' affiliation and e-mail followed by the keywords (up to six). Please indicate the corresponding author with an asterisk. The text is Times New Roman, 12 point, single spacing. There is a 12pt space between paragraphs, a 12pt space after level 1 headings, and 24pt space above level 1 headings. The submission of the document should be made at the conference site on easychair (<https://easychair.org/my/conference?conf=autocarto2020>).

Method

As far as references go, DO NOT USE footnotes. For references, use the (Author, Date) style. For example, Smith (1990) indicated that cartography can be fun. That cartography is indeed fun, is clearly evident from the literature (Smith, 1990; Smith and Jones, 1991; Smith et al., 1992). To quote Smith, “cartography is great fun” (Smith, 1997, p. 187). Use the “et al.” form for more than two authors. An example of a second level heading is shown next, and heading levels three and four are included with the template, should you need them.

Dealing with tables and figures (example of heading 2 style)

Special attention should be devoted to making sure that figures and tables fit within the bounds of this page. Each figure should stand alone, with a caption and a reference in the text (Figure 1).

Figure 1: A gratuitous graphic. Use this caption style for figures and tables.

When you need to insert an equation, just go ahead and use the Word equation editor, for example:

$$A = \pi r^2$$

Results

There is no need to number equations, unless it is important to refer to them. Tables can be treated the same as figures, and be embedded into the Word file. They should be referred to in the text, and have their own number sequence, independent of figures. They also need captions. Avoid having figures and tables roll over or be split between pages. You can usually move them around until they appear on their own page. If not, you can force a new page using the Insert Tab and Break menu choice. Use the standard table tools in Word, or import the table from Excel or equivalent (Table 1).

Label	Distance (m)	Height (mm)
Aardvark	99.4	32.3
Banana	12.5	112.5
Caterpillar	745.5	1,123.9

Table 1: A meaningless table.

Discussion and Conclusion

In cases where formatting is uncertain, use the sixth edition APA Style Guide (apastyle.org). Sample references are listed below, and are cited in APA format. We recommend when DOIs are available, that you include them. For more information about formatting references, Taylor and Francis provides a guide here: www.tandf.co.uk/journals/authors/style/reference/tf_APA.pdf.
