FOREWORD	v
PREFACE	vii
KEYNOTE ADDRESS AT THE OPENING SESSION OF AUTO-CARTO VI Professor F J Ormeling, President, International Cartographic Association	I
<b>Part 1: Computer Cartography's Contribution to Problem Analysis and Institutional Decision-making</b>	
B F CAMPBELL and G MAFFINI Product/Market Matching System	11
REBECCA M SOMERS Computer Mapping Development at the City of Calgary	21
D ROSS BRADLEY Cartographie Assistée par Ordinateur pour le Recensement du Canada	30
I K CRAIN and C L MACDONALD From Land Inventory to Land Management	40
STEIN W BIE Organizational Needs for Technological Advancement	47
<b>Part 2: Issues and Problems Relating to Cartographic Data Use, Exchange and Transfer</b>	
KENNETH D KORPORAL A Demonstration Transfer of Remotely Sensed Data Utilizing the Standard Format for the Transfer of Geocoded Polygon Data	53
BRUCE D WOOD and DAVID H DOUGLAS Cartographic Feature Coding	62
JULES COTÉ Le Graphisme Cartographique Assisté par Ordinateur Combiné à une Base de Données Alphanumériques: un Puisant outil d'Analyse	73

NICHOLAS R CHRISMAN The Role of Quality Information in the Long-term Functioning of a Geographic Information System	79
<b>Part 3: The Merger of Computer Data and Thematic Mapping</b>	
DAVID J COWEN Rethinking DIDS: the Next Generation of Interactive Color Map- ping Systems	89
JEAN-PAUL DONNAY Un Logiciel de Cartographie Assistée par Micro-ordinateur	93
J AHN and H FREEMAN A Program for Automatic Name Placement	101
EWA SIEKIERSKA Towards an Electronic Atlas	110
CHRISTOPHER M GOLD Common-sense Automated Contouring: Some Generalizations	121
<b>Part 4: Mathematical, Algorithmic and Data Structure Issues</b>	
MICHAEL BLAKEMORE Generalisation and Error in Spatial Data Bases	131
M A COMEAU and E HOLBAEK-HANSEN Compression and Compaction of Binary Raster Images	140
MARVIN WHITE Tribulations of Automated Cartography and How Mathematics Helps	148
WM RANDOLPH FRANKLIN Adaptive Grids for Geometric Operations	160
DAVID M MARK Automated Detection of Drainage Networks from Digital Eleva- tion Models	168
ROBERT D RUGG Building a Hypergraph-based Data Structure	179
GEOFFREY DUTTON Geodesic Modelling of Planetary Relief	188
